[Message]

The blitz my fellow broadcasters are doing, trying to overturn the FCC's licensing of LOW POWER FM, is pure GREED.

From building great radio stations over 30 years, I see this as the last chance a minority, church, school, small coastal (hurricane prone) community, or other non-profit will have to have a VOICE in their own community.

The big broadcasters have bought up all radio in all markets, with no diversity in speech, format or public service.

Please look at this and bvac Chairman Kennard and the FCC.

My suggestion to Bill is to compromise and "give third channel protection". This would squelch any legitimate objection the big guys have.

No. of Copies rec'd 0+1
List ABCDE

Thanks!

Chuck Langley
